

# HogBox

## The ultimate in flexible bulk-handling for retailers and industry

Created as an end-to-end transit system, the HogBox is capable of being used at suppliers as an individual box, consolidated for efficient bulk handling in transit and separated for movement to shelf.

HogBox combines the large volume of a pallet box with the ease of use of a small tote box.

1,000mm (l) x 600mm (w)

200 litres/100kg capacity

No pallets needed to move

No one-trip packaging

Zero waste

Stackable/nestable

6 boxes secured as 1 unit with the Loadhog Lid

50% less vehicles

Faster unloading

25% faster shelf replenishment

Maximum security

The unique half UK pallet sized HogBox is the only attached lid, nestable container of its size.

The patented design provides the perfect balance of carrying capacity and easy handling and can be used for a wide range of products individually or as a system with the Loadhog Lid as an end-to-end transit and replenishment solution.

As an individual unit, the HogBox has a 100kg / 200 litre capacity. The inbuilt pallet feet allow it to be moved by all standard pump trucks, forklifts and long-leggers without the need for a slave pallet.

The lids can be sealed to protect the product inside, the boxes can be stacked on one another when loaded, or nested inside one another when empty to save space.

## As a system...

For efficient bulk movement of product, individual HogBoxes can be stacked on one another and secured with the Loadhog Lid as a completely secure transit system.

When secured, up to 6 HogBoxes can be moved as one unit and double stacked in transit or storage with no need for pallets or one trip plastic packaging materials.

## The patented lifter...

The patented lifter can be used to lift, stack and manoeuvre HogBoxes easily and quickly with no additional equipment.

Usable as a tool for picking, the lifter allows an operator to adjust the height of any HogBox for safe and fast product picking or shelf replenishment with a simple foot pedal press.

## Loadhog Ltd

Loadhog is a multi-award winning manufacturing company based in Sheffield, UK. An employee owned organisation, genuine innovation and new product development lies at the heart of our business.

Our aim is to solve every day problems within logistics and supply chain operations – reducing transport requirements, eliminating packaging waste and making life easier for those using our products.
